vue

vue uses HyperCard's picture command (XCMD)
to display pictures at full screen.
You can view picture files, resources or the clipboard,
zoom in and out, move around and take screen shots.

vue requires HyperCard 2.1 or later.

How to use it

zoom in: cmd-click
zoom out: option-click
press+keep mouse down to move
shift: screen shot
click briefly: close

Scripting

vue f, kind, dither, scale, rs

f: name of file or resource, ignored if kind is clipboard
kind: file, resource or clipboard
dither: dithering property of the picture window, default is true
